

Using the US Census Demographic Data Map Viewer

2020 Census Demographic Data Map Viewer A Story Map United States Census 2020

Population | Race alone | Race alone or in combination | Hispanic Origin | Housing | Group Quarters

Population Density | Population Change | Population Age 18 and Over

This map shows the population density—expressed as persons per square mile—from the 2020 Census at the state, county, and census tract levels. Zoom in to see county- and tract-level data. Click on the map to learn more.

Legend

State (or state equivalent) boundary

Persons per square mile by state (or state equivalent)

- 2,000.0 or more
- 1,000.0 to 1,999.9
- 500.0 to 999.9
- 100.0 to 499.9
- 50.0 to 99.9
- Less than 50.0

U.S. density = 93.7

California (06)
Population Density: 253.7
Total Population: 39,538,223
Land Area (sq mi): 155,858.3

You can explore and interact with multiple maps on this webpage.

The maps are categorized under topics. Each topic has a tab, and each map has its own tab under that topic. Click the tabs to move from topic to topic and map to map.

If you zoom in on the map by clicking on the button in the upper left, the map will switch to show counties. Zoom in further to see census tract areas. Each census tract area includes an average of about 4,000 people (but can vary from 1,200-8,000), so these areas can be used to collect information about a local area.

Click on the search button and enter an address to go directly to that location and see census tract level information. You can zoom out from there to get back to county level information.

You will be able to interact with the maps to extract specific data. Click on any area shown on the map to see a pop-up with the specific values for the variables included in the map.
